

Kimochis®

Name: _____

Kimochis®

Materials: Feeling Detective™ Badge Template, foil, cardboard, crayons, fastener

This is a great project to do with your students – Create “Feeling Detective™” Badges!

Start by printing enough badges for all kids and have them color them.

You can then cut along the dashed outlines.

When you are ready to make them into badges, cut pieces of aluminum foil sized to match the dashed outlines. Trim the colored badges to the thick black outlines and glue each badge to a piece of foil.

Cut pieces of cardboard to the size of the badge. You can then place the badge over each piece of cardboard and fold over the foil edges. Secure them with glue or tape on the backside. Viola! You have new “Feelings Detective™!” badges that you and your students have created together!

You can use pins or clips if you want students to wear them, or they can receive them to put on their desk or workspace for the day if you like!

These are great to have on-hand at your desk, or display them as part of your Kimochis® Corner!
